

Mpox

Mpox

Mpox Home

CDC is updating webpages with the term "mpox" to reduce stigma and other issues associated with prior terminology. This change is aligned with the recent [World Health Organization](#) decision.

# 2022 Mpox Outbreak Global Map

Data as of 05 Jan 2023 5:30 PM EDT

View: ☐ CASES ☒ DEATHS

[< 2022 U.S. Mpox Outbreak](#)

## Confirmed Deaths

74

Total Deaths

60

in locations that have not historically reported mpox

14

in locations that have historically reported mpox

## Locations with deaths

17

Total

14

Has not historically reported mpox

3

Has historically reported mpox

Legend

- ☐ Has not historically reported mpox
- ☐ Has historically reported mpox

**Notes:** Case data reported since January 1, 2022 are provided for situational awareness and subject to change. Confirmed cases include those laboratory-confirmed as mpox virus and may include cases only confirmed as orthopoxvirus. Among locations (including countries, territories, and areas) that have not historically reported mpox, several have reported sporadic cases linked to travel or imported animals prior to 2022. Additionally, Ghana has not historically reported mpox cases, however, the country was identified as the source of a shipment of wild mammals that subsequently led to the [2003 outbreak in the U.S.](#)
